President to Send His Letter to Congress.

Washington Chosen as the Location and Higher Education as the Aim.

(BY DIRECT WIRE TO THE TIMES.) ASHINGTON. Dec. 9.—[Exclusive Dispatch.] The Presiden will send to Congress a special message, including in it a letter recently written to him by Andrew Carnegie, in which he proposes to give \$10,000,000 to the American people as a fund for the establishment of a college of higher education in this city.

lishment of a college of higher educa-tion in this city.

Carnegie's idea, in a general way, is to turn this sum of money over to the United States government, to be held in trust for the maintenance and ep-eration of the proposed college, just as the funds that maintain the Smith-sonian Institution are now handled. The government is to be in no way connected with it, except to take care of the money and to be represented by a board of regents, such as now con-trols the affairs of the Smithsonian In-stitution.

of regents will be appointed, as in the case of the Smithsonian Institution, or it may be that the government will be represented upon the board of directors, which, it is contemplated, shall consist of men of national reputation. Carnegie has kept the proposed endowment a secret until he could definitely arrange the plan and scope of the new university. Even yet, all these details have not been arranged, so that little more than the outline of his gift can be published.

It is known, however, that he does not propose to ask from Congress a single foot of land upon which the university building will be constructed. The entire expense is to be borne out of his endowment. No site has yet been

of his endowment. No site has yet bees selected. It will, however necessarily be very large, as it is proposed to erect a series of magnificent structures. The amount of money to be given by Carnegie equals the sum of the present endowment fund of Harvard and is considerably more than the invested fund of Yale.

At San Pablo, Buena Vista and other points, skulls and bones of the dead bodies which were recently burned, are still visible from the trains.

The government forces under Gen. Castro did not meet any Liberals on arriving at Agua Duice. The Liberals are supposed to have retreated to the mountain fastnesses, where Castro will pursue them.

At Panama it is thought probable that Gen. Alban will devote his attention shortly to an effort to recapture the port of Turnaco, which is now held by 2000 Liberals.

Sociation (Pa.) Dec. 2.—The conference of the American Federation of Labor was in session only two hours today, adjournment being taken until tomorrow morning in order to enable the several committees to consider thet large number of resolutions still in their hands. There was a lively discussion on the floor over the question of boycotting machine-made cigars. It is the same question that the Cigar-makers international Union has brought up at previous conventions of the federation, and the union has always been defeated in its fight against the introduction of machinery in the cigar trade. At the present time not a machine-made cigar in the United States, it is said, bears the label of the Cigarmakers International Union.

The matter came up in the form of a resolution presented by President. Geomers, John C. Durbell and Thomas

a resolution presented by Presiden Gompers, John C. Durbell and Thomas F. Tracey of the Cigarmakers' Union and was referred to the Committee on Labels. It denounced a certain company for making cigars by child labor and machine, and called upon the federation to assist in unionizing the various plants of the

law of progress.

The moving of the previous question quickly ended the debate, and the resolution, with the word "machinery" stricken out, was adopted as recom-

ECRANTON (Pa.) Dec. 9.—The Committee on Resolutions of the American Federation of Labor convention this morning reported a number of resolutions and the delegates immediately proceeded to consider them. These resolutions were adopted: Piedging the assistance of the federation to the Journeymen Taylors' Union in its contest for free shore; petitioning Contest for free shore; petitioning Congress to amend the marine laws, so that every seaman shall have the right to quit any merchant vessel on which the service has been obnoxious to him: gigantic rafts.

The Committee on Labor reported the The Committee on Labor reported the following resolutions, 'which were adopted: That the federation refuse to recognize labels gotten up by rival unions of the Tobacco Workers' International Union; reindorsing the blue label of the Tobacco Workers' Union; that the federation draw up a form of the total control of the total labels of the Tobacco Workers' Union; that the federation draw up a form of obligation that will instruct all new members to demand the union label wherever they purchase manufactured goods; indorsing the union stamp of the International Union of Journeymen Horseshoers, and indorsing the label of the Actors' National Protective Union.

A resolution boycotting cigars made by child labor and machinery caused a long discussion. Many delegates maintained that the federation could maintained that the leaeration could not successfully oppose the introduction of machinery. They advocated the organization of operators of machines like those who operate typesetting machines. The resolution, with the word machinery" stricken out, was adopted.

Some business of a purely routine nature was disposed of, and the convention then adjourned until tomorrow morning. This was done to allow the several committees to give delegates a hearing this afternoon and tonight on resolutions that have been referred to their consideration.

their consideration.

Before adjournment, President Gompers announced the appointment of W. D. Malone of the Amalgamated Association of Street Car Employes and President John Mitchell of the United Mine Workers as a committee to take charge of the street-car strike in this city.

[BY DIRECT WIRE TO THE TIMER.]

AUBURN (N. Y.) Dec. 9.—[Exclusive Dispatch.] Auburn prison authorities are investigating the reported anarchistic plot to blow up the prison with dynamite in revenge for the death of President McKinley's assassin. Previous to the execution, Warden Mead received letters daily from various parts of the country, threatening most terrible vengeance if the law were carried out. Investigation so far has revealed that an attempt has been made to scale the prison walls from West Water street side by means of ladders. The latters were stolen from a mill in the neighborhood.

What alarms the prison officials must is the discovery of paper such as is used to wrap dynamite packages, which was found on the ground near the ladder. For the last two weeks west Water street has been haunted by unshrells tinkers.

Mountain Ranges Afford Endles Hiding Places for the Guerrillas and They Have All the Food They Need-Demanding Mortality Pigures.

NEW YORK, Dec. 2.—A correspond-ent of the London Times and New York Times, wiring from Pretoria, says much remains to be done in the way of partitioning the country by means of lines of blockhouses before the British can hope effectively to clear the Bosta away from the long dis-

yards apart, and connnected by means of formidable wire entanglements, will prove effective.

To thread the country in this way, says the correspondent, requires time and men, but, in the opinion of the military authorities, it is the only method of dealing with an enemy, who refuses to fight, and adopts guerrilla tactics. The British public must, therefore, be patient.

North of the Delagoa Railway line, the dispatch goes on to say, the Boers are momentarily free from the presence of the British columns. The mountain ranges afford endiess hiding places for the enemy, supplies are pientiful and wheat, which finds its way all over the country, is carefully concealed for future use. It is impossible to avoid this unless the Boers are kept moving, and to effect this many more troops are required.

Maj.-Gen, Nelson A. Miles and President James J. Hill of the Great Northern Railroad Company indulged in an excting impromptu foot race at Billings, Mont., the other day, and the excting impromptu foot race at Billings, Mont., the other day, and the army officer won easily.

In company with Senator W. A. Clark they were on their way to Canton, O., to attend the late President McKinley's funeral, in Mr. Hill's private car. They were standing on the platform at the extreme rear end of their car, talking to some friends. The engine crew ahead was busy fixing a hot box on one of the tank's wheels. Suddenly and without warning the train began to move, and the two men thought it was starting out of town.

The train was short, and the engine a powerful one, and in a half-coach length would be moving at a ten-mile rate. To get on board they must either climb over the high iron railing that surrounded the observation platform or make a run of sixty feet to the front platform of the car. In an instant and without consultation both decided to run for it, and they started even. It was a bot race, while it lasted, and Gen. Miles distanced the railway man, winning by seven feet.

Just as they had mounted the platform to where the station platform was lower, in order that he might work on the hot box to better advantage.—[New York Times.

This forenoon, Antonio Boto, a four-teen-year-old boy, testified that on the afternoon of July 2t, the day of the murder of Narona, he was on the mountain trail between Almaden and Guadalupe, and not far from the spot of the murder met Coronado. The defendant, when on the stand swore that he was in his cahin all day on the 2th of July. It is the contention of the prosecution that Coronado, after killing Narona, remained near the spot until the people living near his residence had gone to bed, and then returned to his cabin.

patch.] Heroic work of the fire department today saved from destruction the sawmill plant of the Tacoma Mill Company, dwned in San Francisco, and valued at over \$500,000.

The fire started in the dry kiln over the planing mill, and spread rapidly throughout the kiln. Four fire companies and the fireboat Fearless concentrated their work in an effort to keep the blase confined to this kiln. They soon had fourteen streams of water playing on the fire, and succeeded so well that even the planing mill underneath was not burned. This

water playing on the fire, and succeeded so well that even the planing mill underneath was not burned. This record is considered especially good, as experts of underwriters from San Francisco and Portland have repeatedly stated that the entire manufacturing district of Old Tacoma would be swipt if fire ever gained headway among the highly-combustible material there. It is believed the successful work will also have a bearing on the effort the Tacoma Chamber of Commerce is making to secure lower insurance rates for this city.

Ladderman W. B. Galliher was killed and Lieut. George Osborn injured by falling off the roof of the dry kiln while they were engaged in playing streams of water upon it. The roof fell immediately following a sudden explosion, apparently caused by the spontaneous combustion of dust. They were caught beneath a heavy mass of broken and splintered boards, weighted down with quantities of wet sawdust. Galliher was crushed and injured internally. Osborn will get well. The property loss to the mill company is \$20,000.

BOARD OF STEWARDS MEET.
BY THE NEW ASSOCIATED PRESS—A M.)
CHICAGO, Dec. 2.—What promises to
be one of the most interesting of the
Western Jockey Club's meetings is in
session here today. The board of
stewards met at noon to elect officers
and arrange dates for the next year,
but besides this a general adjustment
of the troubles and rivalries among
"outlawed" tracks will take place.
Local horsemen believe that after today's meeting western turf matters
will pass under the exclusive control of
this organization. It was announced
today that the opposition tracks at the
Fairgrounds and Delmar, which heretofore have been a thorn in the side of
the Jockey Club, will become strong
allies. BOARD OF STEWARDS MEET

(BY THE NEW ASSOCIATED PRESS-A.M.)
OAKLAND, Dec. 3.—Betting on the
Lavigne-Hegarty fight commenced Saturday, with Hegarty a slight favorite.
Jim Davis, the bookmaker, bet 256
with an Australian steamship captain
against 2000. Davis took the Lavigne
end. This is the only bet of consequence that has been made to date, and
when the news spread the Lavigne men
held back for odds.
Quite a number of Australian residents of San Francisco visited Hegarty's training quarters yesterday, and
Hegarty made them happy by stripping
to punch the bag and do some symnasium work for their amusement. Lavigne's quarters were visited by Jockey
Joe Piggott, George W. Miller, Danny
Lynch and a large party of horsemen. LAVIGNE MEN WANT ODDS

STOCKTON, December 3.—Henry
Kroeckel, inspector of rifle practice of
the Sixth Regiment, N.G.C., who recently broke all rifle records at fifty
yards on the Columbian target, sürpassed that performance yesterday,
when he scored 249 out of a possible
250 at fifty yards, with a Colt's army
Ss-caliber revolver, three-pound pull. 38-caliber revolver, three-pound pull.
The man target was used, and all but one of the fifty chots struck within a few inches of the region of the heart.
There were forty-nine fives and one

four.

The first ten shots could have been covered by the hand, so close were they together, and 30 per cent. of the shots could have been covered with an ordinary hat. This score entieles Kroeckel to shoot at the State shoot to be held at Sacramento in January.

Doublet Gains a Victory Over a Good Field in the Fourth Event-John Peters the Medium of a Heavy Play to No Purpose.

IBT THE NEW ASSOCIATED PRESS-P.M.) SAN FRANCISCO, Dec. 3.-Close inishes and the defeat of four fayorfinishes and the defeat of four fayorites marked the sport at Oakland today. Native and Orleans were the only first choice to reward their backers. The former won as he pleased, but Orleans only beat Plohn a neck, Doublet gained a victory over a good field in the fourth event. Imp. Royal Flush beat Frank Bell for the place. The trio were necks apart. John Peters was the medium of a heavy play in the two-year-old event, but he was led past the judges by St. Sever. The latter was entered for \$800, and Tom Ryan bid him up to \$1000. Dr. Rowell retained the gelding. The weather was cloudy and track heavy. Results:

An important mining transaction of especial interest to a number of local capitalists, who have acquired holdings in the Huachuca Mountain district of Arisons, has just been consummated, the property involved being the famous Wickersham mines. The Huachuca Consolidated Development Company has purchased the mines, for a price that has not been made public. The mines have been worked for several years and have every indication

By this acquisition the Huachuca com-By this acquisition the Huachuca company becomes the possessor of one of the best groups of gold mines in Arisona. The company now owns twenty-two full mining claims, located in the richest section of the Huachuca Mountains and easy of access.

There is considerable activity in gold and copper mining in the Huachuca Mountains. The abundance of wood and water greatly reduces the cost of mining and milling, and, coupled with that fact, in every case the mines are so located that handling the ores to mills is done by the gravity system.

BISBEE WEST'S LUCK.

Another block of ore has been encountered in the Bisbee West property, and prospects of that mine becoming one of the important producers of the Territory are hrighter than ever. The strike was made in the 600-foot level, and the ore bodies show clear across the face. Over 340,000 has been expended in developing the property, which has workings to a depth of 740 feet. A pumping plant is being installed.

CERRO DE PASCO MINES SOLD. CERRO DE PASCO MINES SOLD.

In a letter written from New York to a friend in this city. J. B. Haggin states that he and associates have just purchased the well-known Cerro de Pasco copper mines in Peru, South America. Arrangements are being made to expend \$1.000,000 in railroads, smelters and other improvements that will enable them to carry on development work on a much larger scale than ever before. For many years Haggin has been associated with the development of copper.

GOLD NEAR ANGELS.

The entire Utica group of mines near

Angeles, including the Stickle, Madison, Cross and Utica claims, have opened up again. Since the shutdown over a month ago \$20,000 has been expended for machinery and improvements on the water system. About six hundred men have gone to work for the winter, and it is anticipated that a large quantity of ore will be taken out of the group.

In the same district an exceptionally rich strike of gold was made last week in the Gold Hill mine. A large vein of ore running \$48 to the ton has been uncovered and the mine has been shut

SANTA ANA PROSPECTORS. SANTA ANA PROSPECTOPS.

News has been received of the mining and exploring party which left Santa Ana, several weeks ago for a point about four hundred miles below Ensenada. The prospectors are making their way slowly overland by wagon and team, with an Indian guide. The party consists of L. Wilkinson of Newport Beach, A. Y. Wright and George Peabody of Santa Ana, and they expect to reach their destination in about thirty days.

RANDSBURG FIELD.

As soon as the whereabouts of Alexander Radamaker has been discred, the Radamaker mine will pass into other hands, as the sale of that property is all but consummanted. But there is great uncasiness as to his whereabouta and safety. "Several months ago he left here with burros and a buckboard for a trip into Arizona prospecting." says the Randsburg Miner. "Since that time he has only been heard of once, and that was on this side of the Chuckawalla Mountains. He then had a ten-gallon keg of water and half a canteen full. He was advised to go by the mills, where he could get water, but he insisted that he knew the trail, and could get through. Nothing since has been heard from him, although interested parties have spent \$500 to locate him in order to get his signature to a contract of sale of the Radamaker mine."

In the Buckboard mine was recently uncovered a pay chute of ore that carries a value of \$10 to \$45 to the ton.

The Butte Lode, in the same field, had a milling of innety-five tons of ore at the Red Dog mill last week that resulted in three handsome gold bars, valued at \$6250, or nearly \$50 per ton.

# Angeles Herald's Immense Uncirculated Circulation and Rank Frauds for Deception of Its Advertisers.

ch of truth has been applied to the Los Angeles Herald's | Angeles, and of the Herald's recent Redlands agent, as to the enorm of soley and nesty steam, let off last Sunday, and after or has cleared away the few drops of precipitation remainto be so many deliberate and unadulterated lies. see how plain a tale shall put him down :"

unty of Los Angele

1. L. Levering and Philip Royer; owners and proprietors of the ads News Agency, and until recently Redlands agent for the Los les Herald, first being duly sworn, depose and say:

That every paper in the pile shown in the accompanying picture a one copy of the New York Herald, are copies of the Los Angeles is, and that no other papers of any kind are in the pile. They ere say that these papers were sent to them during the last mito in excess of the number required to be served to subscribers braid in Redlands and vicinity, the territory covered by their such excess amounting in numbers to from 100 to 350 copies They further-more say that they cannot swear as to the exact of papers in the pile, but themselves and others. competent to have estimated it to contain from 35,000 to 45,000 Herelds y further say that they have, at various times, during the last,

sent of the five disinterested business men of Los raphers of like waste heaps in Riverside and Pomona. The

pile of about 40,000 unsold copies of the Los Angeles Herald stacked up in a Redlands warehouse, as shown by the photograph; second, that the Herald's several allegations relating thereto are unqualifiedly false and designedly fraudulent.

It is demonstrated that there were between 35,000 and 45,000 papers in the pile that attracted the attention of the deceived and defrauded advertisers, and that all of them were Los Angeles Heralds, uncircu lated and unread, except one copy of the New York Herald.

The Los Angeles Herald had sent out to its former Redlands agent with whom it subsequently quarreled, from 100 to 350 copies a day more than the number required for subscribers, in order to hoodwink advertisers into the belief that the Herald had a large circulation in

After the exposure of this trick by some of the defrauded adve isers, the Herald resorted to another subterfuge to befog the public and delude its patrons.

It engaged an agent to go to Redlands and buy up another lot e ansold copies of various papers which had been accumulating in another place for years. These papers were not the ones photo graphed in the pile referred to by the former Redlands agent; no the ones seen by the four disinterested gentlemen who made the original statement; and the Herald knew it,

The Sunday Herald contained affidavits stating that this prepared pile of papers (to which no reference had previously been made by it, by its agent, or by the advertisers referred to) numbered in all only 10,800 copies, "of which there were 4800 copies of the Herald; 2500 opies of The Times; 1500 copies of the Express; 2000 copies of San Francisco, New York and other eastern and California papers."

" Desperate indeed must have been the managers of the Herald to resort to a scheme so easily exposed. The number of papers in the miscellaneous heap to which affidavit is made has nothing to do with the case. The Herald knew it. It was simple enough to believe that this fact would be lost sight of by intelligent readers in the cloud of steam ruised by its raucous rour.

The original photograph showing the pile of 40,000 (more or less ansold and unread copies, comprising the Los Angeles Herald ex clusively, together with the affidavits of the recent agents of the Herald at Redlands, making oath to the facts, is herewith reproduc From such evidence there can be no escape. The men who make the ffidavit are the men to whom the papers were sent by the Herald by whom they were stored, and by whom they were subsequently sold in lots as "old papers."

Furthermore, investigation develops the fact that Southern Califo nis is salted, peppered and honeycombed with these piles of dead and unread copies of the Herald. We present pictures taken by photo

> opies have been sent out withou regard to the demands or ne he Herald people to misrepresen the size of their circulation to for the delusion of advertisers.

The cases of Redlands, Rivers ide and Pomons are examples; what may be found in the chief towns all over Southern California, in a greater or less degree. The Times knows whereof it speaks in this re-

"Be sure your ain will find you out." Hardupson was able to float his fake oil companies, to unload his one-cent stock on his victims at 75 cents, and congratulate himself on his profits after the stock had dropped back to a cent and he was well out of the woods. He could this racket all right in his natural habitat, the fake oil company field; but when he attempted a similar game in the domain of news paperdom, he got caught. There he has proved a failure, even as a fakir. The poor, ignorant, vicious, self-seeking pretender in the domain of journalism has been unmercifully victimized by his scheming, leg-pulling hired men, and it is no wonder that he is desperat and abusive. His complete failure makes him furious; but he has only himself to blame, not The Times, which he undertook to destroy.

The Herald's latest attack on The Times is a manifestation of the ame spirit which instigated the infamous boycotting "movement" begun against The Times last spring by ex-Convict Gregory, then an editorial writer on the Herald, and recently renewed against The Times and extended to merchants who do not advertise in the Herald, the chief 'movers" being two Herald employees. Sunday's outbreak was new only in form. It was the same old work of the same old Gregory Hardupson Fennesy-Stamps gang.

But the circulation fraud and the boycott are alike miseral "res. We reiterate that it is a fact proven beyond cavil that the Los Angeles Herald has the largest fake circulation, the largest dead circulation, the largest unread circulation and the largest warehouse circulation in the State.

The boy was taken into Mr. Heilman's famility, where he was treated as a son, and his application to detail coupled with a rare knowledge of business methods, soon advanced him to positions of trust in the banking institution. He was a most, affable and pleasant young man and made many friends, and I. W. Heilman reposed the greatest confidence in him. Fleishman was a student of languages and became a proficient master of French, German and Spanish as well as English, an accomplishment which was of great value in the bank's dealings with foreign-born patrons.

Fleishman was married about twelve years ago to Miss Wictoria Harrell, only daughter of the late Jasper Harrell, who was a wealthy cattleman of the Upper San Joaquin Valley, and of various other valuable properties. FLEISHMAN IN THE CITY.

Personal Friend Says He is in Hiding-Talk of Suicide.

"Harry Fleishman is not 60 feet from The Times Building this very minute, and he will not try to leave the city," said a warm personal friend of the missing cashier to a reporter at midnight.

This man, who positively refused to let his name go into print, or to reveal the whereabouts of Fleishman, said he talked to him as late as Sunday, and knows where he is.

"He did me many a good turn and I will not give him away, but he is in the very center of town and there is a woman with him," the speaker continued. "He has a big bunch of money from the bank cached, and will name his terms, and there will be no prosecution. A day will show that this is true." These statements came from a source about the reliability of which a question hardly could be raised.

Other-friends of the young banker incline to the belief that he has committed suicide, or will do so if ap-

Early this morning the Chief of Police received a telephone message from a man whose name he did not understand, stating that Fielshman had killed himself in a South Hill street lodginghouse, and that his body had been taken to Bresse Bros.' undertaking rooms. The Chief's informant hung up the telephone receiver before his name was learned.

Bresee Bros. stated that they have but one body at their who died several days ago. The Coroner had not been notified of any suicide or other case which required his

When told that cold facts and not cash were wanted, the young woman relapsed into slience, and Mrs. Cunningham again rapeated that she was shocked at Mr. Fleiahman's disappearance, and then she declared positively that she was not with the missing man Friday night; that she had not seen sick; that she did not know that he contemplated leaving the city; that a mistake had been made in accusing him of stealing any money, "and, "she added, "I'm sure he will come back,"

1901, to date, are 1454 carloads, of which 176 were lemons. LOCAL PRODUCE MARKETS

The week opens quiet in the produce markets. The general tone all along the line is one of firmness. The only quotable change is in wheat, which is marked up to \$1.20, as the mill price in 100-pound sacks. The cheapest grade is \$1.10, and the general jobbing market, \$1.15, all other cereals are firm. Hay is firm, with a good demand for choice barley or elfalfa.

Oranges are moving out very rapidly, 139 carloads going last Friday.
Apples are steady and very likely to go higher before many weeks.
Butter is steadier, the passing of the threatened rain having had somewhat of a steadying effect.
Eggs are very firm, local rainch continuing to be very scarce.
Live poultry is quiet, but prices are steady as stocks are light.
There were plenty of jack rabbits in but wild ducks are scarce.
There are no further changes in provisions. That market is steady.

Remarkable Experience With a Time-piece in Tustin—Rowdyism and Van-dalism in Santa Ana—Attempted Hold-up of a Bicycle Rider.

SANTA ANA. Dec. 3.—(From The Times Resident Correspondent.) Henry Yount has plowed up an open-faced silver watch in his walnut orchard in Tustin which he lost while cultivating seven years ago. After finding the timepiece, which was a present to-fits sox, John Yount, from John H. Cullom, after whom the lad was named, Yount soaked it in kerosene for a few minutes, and then wound it. To his surprise it began running, and is now Keeping correct time. There was a small crack in the crystal when it was loat, which makes it all the more remarkable that it should run now. During the seven years the orchard has been thoroughly irrigated from three to fur times annually, and has been cultivated many times. The silver ease has bronzed, but otherwise seems intast, and perfectly waterproof. Yount prizes the relic.

There has been much vandalism in Santa Ana during the past few weeks. People are becoming aroused, and there may be some wholesole exposures. There have been several wires and ropes stretched across the streets ast night in dark places, and the past few nights stones have been hurled through several windows. Last night about 8 o'clock a rock went crashing through the plate glass in the front door of the residence of Mayor Frank Ey on North Main street, and only about a week ago a rock was thrown through the window of Thomas McKeever, on the same street. It transpires that rocks have also been thrown through a window at the home

UNSEEMLY SQUABBLE.

The clash between the city and the San Bernardino Electric Light Company, that came Saturday, resulting in most of the street lights being turned off at night, and in the serving of a temporary injunction on the company, does not redound to the credit of either parties to the controversy. Undue publicity has been given in some quarters to the squabble, which hinges on the payment of a bill of less than \$900, which the lighting company claims the city owes for services rendered several years ago. Such kindergarten tactica as have been resorted to on both sides must cause the outsider ta wonder what

PECULIAR WEATHER. few weeks in this county have been of great benefit to farming. Since the first early rains there have been many heavy fogs—more than have been experienced for many years, and as a result the feed has kept growing and it has been possible for the farmers to keep their plows going steadily, thus breaking up an unusually large acreage for the usual winter crops. The experience of the past few years has demonstrated that early-sown grain is more profitable than the late sown, and the farmers this year are working along the more successful lines that experience has taught them. While the fogs have been unpleasant to some degree, they have surely been of great benefit, and this being the case, the people feel that they can be endured with patience.

CHAPTER OF ACCIDENTS.

Testerday afternoon as Mrs. John Wessel was driving to Colton, when nearing her destination, the horse became frightened. Mrs. Wessel sprang from the vehicle, and landed in the gutter, in some way twisting her leg beneath her as she fell, and the whole weight of her body went on it. The leg was dislocated at the knee, and her suffering was intense.

About the same time the Misses-Rollins were driving on Eureka street, when the horse took fright, and started at full speed. One of the young ladles, Miss E. Rollins of the Sunset Telephone Company, sprang from the buggy, falling on her face, and was badly bruised and bleeding when taken into a near-by house. The horse turned the corner at Brookside, and started down Citrus with the other Miss Rollins, screaming for help and the reins dangling. The horse dashed into a hitching post in front of Dr. Reilly's house, and while Miss Rollins was thrown heavily, she was not injured.

Last night a Japanese, Tsuneda by name, was thrown from his bicycle while riding on one of the side streets and suffered a very serious fracture of his left shoulder.

S POTS ENOCKED OFF BIG JIM JEFFRIES LITTLE EAST SIDE TAILOR DIE THE BUSINESS. The Mystery is, Why is the Champi of the World Wearing a Gasoline-cleaned Suit of Clothes With Spots That Come Back?

Jim Jeffries, "de champ," had the spots knocked off him yesterday by a little German tailor with a sauerkraut accent; but they didn't stay off.

The way the thrilling news first came to the sporting world was that Mr. Jeffries had been measured for a suit of clothes at an East Los Angeles tailor shop. More careful investigation revealed the fact that de champ had not had a new suit made, but had the grease spots rubbed out of an old one.

The latest news is at once an intense relief to the cocktail row, a soothing relief to the cocktail row, a soothing balm to the other tailors and a deep and impenetrable mystery to the world

at large.

Yesterday morning "de champ"
rushed into his funny little dye and
tallor shop, where you can get a pair
of stockings darned or have a dress
suit made, and asked if he could have

of stockings darned or have a dress suit made, and asked if he could have a suit cleaned.

"Shoore," said the tailor genially." The tailor is a little man named Herr Smedleburger. He reached out for the suit, but de champ on second thought held it back.

"How long will it take?" asked the champion of the world.

"Two, tree days," said the tailor.

"Hully gee," said "de champ." "I got to have it in half an hour."

The tailor said he couldn'd oit in less than half a day, but the champion insisted with such emotion and fervor that Herr Smedleburger said he would do the best he could.

The champion dodged furtively out the door and came back in half an hour and ducked into the suif.

When he suddenly appeared on the matinea gig's promenade in what appeared to be a new suit of clothes, strained excitement prevailed.

The rest of the sports took notes on the style and cut. Those few who were on speaking terms with their tailors went to their shops and roasted them for leading them off wrongs, while those whose new rags are on the stocks fled madly to have them set back a year in the fashions to be in with de champ's style. Tailors themselves began to have qualms of doubt and apprehension. Fellows who are habitually absorbed in the landscapes when they meet their tailors on the streets felt a sudden righteous indignation and resolved never to pay.

It began to be gradually whispered that de champ had discovered a resithing in tailors in East Los Angeles.

felt a sudden rightsons indignation and resolved never to pay.

It began to be gradually whispered that de champ had discovered a real thing in tailors in Bast Los Angeles. The sports began to look him up, and had it not been for an unfortunate circumstance, the little Herr Smedle-burger might have been amothered in an avalanche of prosperity.

As the champion promenaded, a mysterious spot began to develop on the south side of his vest. Some one mentioned it and his championship wriggled uneasily and his caim, beatific smile disappeared in an anxious look. As the figures come out on photographic plates in a dark room, just so another spot soon rose out of the lesside of de champ's cost. Another coxed out of his trousers, yet another traced its shadowy design on the lapel of de champ's cost.

The horrible intelligence shot through the cocktall route with a shudmais magon, and took nim to justice Court for being drunk and disorderly.

The remains of Miss Annie F. Cody, who came here from Kasio, Fpiday, and died suddenly Saturday night, were taken to her home today. The circumstances surrounding this death are very sad. Mrs. Edward Cody, mother of the deceased girl, had intended spending the winter in Riverside with the daughter, but through some oversight the conductor failed to put them off at that place, so they got off at Cotton and took the motor for Redlands. While waiting for the motor or in making the change of cars Miss Cody contracted a cold, which in her delicate state of health, was more than she could stand. Her father is a prominent politician of British Columbia. Henry Cody, an uncle, is with the mother, and will accompany her home.

George S. Gibson of New Haven, Ct., who arrived a few days ago, will spend the winter here.

BIG TRACT OF LAND

AGITATION TO HAVE IT OPENED FOR SETTLEMENT.

San Diego County People Say Charity Doesn't Accomplish Its Purpose With the Starving Indians-Hall's Alleged

SAN DIEGO, Dec. 2.—(From The Times' Resident Correspondent.) There has been much said of late concerning the starving Indians in this county, and although the ranchers who live in proximity to the reservations have repeatedly denied the reports, ministers and others continue the agitation and the collection of food and money for their relief. Charles Moratti, who is a stockman living mear the Veican Mountain, is in the city, agitating the proposition of getting up a petition to Congress to open a 4900-acre reservation on the mountain for settlement. He says that for some time past the sole occupants of this vast tract have been a half-breed named O'Suna and his squaw wife. There are four additional families living on the outskirts of the reservation, but from are making the least use of the land, nor can it be of value to them. They live by piffering the stock of the white ranchers and by begging from the residents. Moratti says that charity does not accomplish its purpose. If provisions are given to an old squaw who is in a helpless condition, the young bucks hang around her house and glut themselves until all the eatables are gone, and so one is behefited. He says that

this acreage can do the Indians no good, and that it could easily support ten or fifteen American families. The

IMPROVING HOTEL METROPOLE.

AVALON, Dec. 8.—[From The Times. AVALON, Dec. 8.—[From The Times.]
Resident Correspondent.] As the work progresses it develops that the improvements about Hotel Metropole ares more extensive than were first noted. Already twenty-two fine rooms have been added on the fourth floor. An 15-foot veranda has been constructed along the entire front, with the exception of the east wing, which is now being extended to the street. This will give an addition \$2x6. The basement will be used for a ladies' eafe and pool-room; the dining-room will be extended to feet, and there will be sixteen rooms constructed upstairs. The front, which is very plain, will be creamented with buy windows and a tower to correspond with the west wing. On the east side a dozen bay windows will be constructed, reaching from the dining-room floor to the roof. The front wall of the office and music room, fronting on the broad plassa, will be entirely removed and replaced by plate glass, and a grand stairway, replacing the present one, will lead up from the office. There will be a total gain of thirty-eight rooms, and with other improvements, which are under contemplation. Hotel Metropole will be made one of the handsomest on the Coast.

A Vast, Diversified Artistic Collection.

Few will be able to judge the magnitude of this handkerchief sale from the printed descriptions which follow. It is impossible to reflect the daintiness and goodness of a handkerchief in cold type. The holiday rush will soon be here. Holiday buyers will be scrambling for these values. We advise early buying as an assurance of perfect satisfaction.

### LADIES' PURE LINEN HANDKERCHIEFS AT 5c.

It is almost past belief that for 5c we can sell a ladies' handkerchief, which we will guarantee to be every thread pure linen—that is every thread of the cloth. They are hemmed. Not quite as large as the handkerchief we sell at 10c, but a very satisfactory size. We believe this lot of handkerchiefs to be the best value that any store ever offered, East or West, North or South. We may be obliged to limit the quantity to each purchaser before the sale closes. There is ample quantity when the sale begins.

# MILES UPON MILES OF HANDKERCHIEFS

And the display is fascinating to the point of bewilderment. Literally tons of handkerchiefs and every one bought direct of the producers except those which come from convents and are hand-worked. Styles for men, women, boys and girls, everything that the producers of the world can supply. This Christmas handkerchief demonstration and sale has been planned on such a broad scale that it eclipses every previous effort of this store or any other in this section. We especially describe some few values and hint at all the rest.

### THE MIDWINTER NUMBER.

On the first of January will be of the Los Angeles Times. To those who have seen previous issues of the kind, it is unnecessary to state that this number will be in every respect an up-to-date expo-nent of the Southern California of the beginning of the Twentieth rbiage in this number, but a carefully compiled digest of the facts and figures relating to the progress of the Southwest uring the past year, such as will "give to think" to our friends in the East who are casting "goo-goo

insue should be received not later than the 25th inst.

No EXCLUSIVE PRIVILEGES.

The Board of Public Works acted wisely in recommending to the Council yesterday that the so-called "loop franchise" saked for her the Portland " asked for by the Pa ch to the central part of the bust uld practically accomplish that reing to that company and the Los Angeles Street Railway Company (which is in effect the same corporation, both companies being under the control of the Huntington-Hellman syndicate) a permanent monopoly of the streets, for street-railway purposes, in the

ady said, to those desiring to make itimate investments in Los Angeles vicinity, it would be an unpardonto grant to any one company, right to barter away the people's in-

There is business enough, in this rapidly-developing city, for two systems of street railway. Competition will insure better service and a more the than would result if the entire ess were monopolized by a single ration. The Traction road is one of the best street-railway lines in the country. It is justly popular in Los of the service on such lines of the Los Angeles Street Railway Company as it comes into most direct competition with. The people desire a continuance of the wholesome competition which has wrought such good results. They would neither forgive nor forget an act of the Council which would give to any corporation or corporations a monopoly such as would prevent the mary. No amount of money which the applicants could pay the city for the monopolistic privileges asked would compensate the public for

The City, Council, in this matter hts of the public from an unwarranted invasion. It is the duty of the Councilmen to protect the peo-ple in this matter, and the people ex-pect the Councilmen to do their duty in the premises without fear or favor. The applicants, nevertheless, deserve

fair and liberal treatment in return for their offer to put large sums of money into the proposed interurban lines. They are fairly entitled to rethe privileges that can be legally granted them consistently with the public interest. The Times renews the expression of its belief that it is feaof urban lines in such way as to avoid the objections urged. So long as the business center is kept from being un-duly obstructed and monopolised by the lines of a single corporation, there scribe the city, to penetrate the resi-dence sections, to reach all the steam depots, to establish a union depot or depots at suitable points, where trans-fers could be conveniently made to ex-isting street-car lines, and, in short, to do almost anything except taking exclusive possession of already con-

During the past year The Tim has published several editorials on the subject of copper and copper stocks, in which warnings have been thrown out has been going on in certain quarters There are, doubtless, some readers of The Times who to ay wish that they had heeded these warnings, and there selves upon having done so. A special dispatch from New York,

ferred to the losses in Amalgamate Copper stock within the past few months as without parallel in the history of Wall street. From \$130 share, at which price stock in this big sideshow of the Standard Oil Company was recently quoted, it has fallen to \$65.50, or exactly half—and the end is not yet. This represents a loss to the investing public, within a few months, of the enormous amount of \$100,758,000. It falls on the rich and poor alike, for the brilliant prospects of the inflated company had been widely and cunningly advertised throughout the land. It is not surpris-ing that this tremendous drop in the of the greatest financial corporat respondent says, send a chill through-out the financial world, affecting noney rates at every financial center

The decline in the price of this stock is attributed by the New York correspondent to an unsatisfactory in-dustrial condition abroad, resulting in a great decline in exports of copper. This may, to a certain extent, be true but there is no question that the de Copper stock is largely due to a tardy recognition by the investing public of the fact that the stock of this big corporation had been outrageously "wa-tered," and that the Standard Off Company has been using it as a club for the purpose of maintaining an artificial price for copper, and at the same time punishing Lawson, the copper king of Boston, whom they do not love, because he refuses to take his place among the captives in chains who follow the Standard Oil jugger

per combination, as an illegally-ormonity. However this may be, there is little doubt that the big slump in

Amalgamated Copper will lead to a more careful investigation of the methods and objects of these great aggregations of capital, and will cause the trusts an unpleasant quarter of an hour, if it does not, indeed, precipitat Amalgamated Copper is only one of a number of trust stocks which been watered beyond all reason.

### PE FOR IRRIGATION.

H The President's recom tem of national irrigation for the reclamation of arid lands are meeting with very general approval in the East and throughout the Middle West. The Chicago Evening Post declares that "with the possible exception of a section of the country in the East, the plan to make fertile the barren lands west of the Mississippi for the benefit of the home seeker and the country generally, has met with universal favor in every State and in every city in the Union." Credit for bringing the question directly to the President's attention, and to the attention of all men prominent in public life, is due in no amail degree to George H. Maxwell, executive chairman of the Na-tional Irrigation Association, and to the National Business League, to which body Mr. Maxwell presented the plan for action.

The learue took up the question in earnest, supplementing the work pre-viously done by the National Irriga-tion Association. At a meeting held in September, 1900, the National Busiess League adopted resolutions calling upon Congress for an annual appropriation of \$250,000 for the recla-mation and settlement of the arid lands of the West. Copies of these resolutions were sent to every United States Senator and Representative in Congress, to every commercial organ-ization in the country, and to every prominent individual and association whom it was thought might take an interest in the project to the extent of assisting it.

The Chicago Post quotes Col. Elliott Durand, chairman of the Executive Committee of the National Busines

League, as saying: "There isn't a large manufacturing or commercial house in the country that isn't favorable to the idea. The plan is to make this land productive and thus add much to the resources of the country. I have traveled extensively in the West, and never have I seen worse country than the bad lands of Utah and other neighboring States. But that it can be made fertile is proved by the fact that in some spots where a station agent or someone else has taken the time almost everything has been made to grow. In speaking so favorably on this matter, it is my opinion President Roosevelt has covered the ground perfectly, as he has every other subject in his measage. Congress no doubt will take up the question seriously."

The following expressions from an

The following expressions from at ident and general manager of the Lake Shore and Michigan Southern Railway, with headquarters at Cleve land, are interesting and to the point

"I cannot express too strongly my appreciation of the recommendation of th President looking to the reclamation of the now arid regions in our Western States and Territories by the Western States and Territories by the construction of great reservoirs for the storage of water. The fact that the President favors the undertaking of this work by the general government is the logical result of his familiarity with conditions in the West, and his practical knowledge of the subject under consideration. subject under consideration.

"The work of reclamation of arid

lands undertaken in the comprehen-sive and thorough manner which its importance not only justifies but de-mands, will require a larger expendi-ture of money than the sparsely-set-tled States of the West can command. Money for this purpose expended by the State must be raised by taxation; this is an obvious impossibility; there-fore, the only alternative left to the State or Territory unaided by the gen-era: government would be to farm out to great syndicates composed of east-ern capitalists, the right to construct the reservoirs, to own the water and to control the land reclaimed. Under to control the land reclaimed. Under this plan the settler seeking a home upon government land must pay trib-uie to the syndicate thus formed in, such amount as the syndicate might elect to exact.

such amount as the syndicate might eject to exact.

"The hope of this country, the sheet-anchor of its safety, in the days to come lies in the rural districts; the one overshadowing cloud more portentous than any other today is the rapidly-growing political representation and influence of the great centers of population as against the country. The hope of the country is in the forty, eighty and 160-acre farms—thousands of them—owned and tilled by happy, prosperous American citizens, and in no way can this condition be brought about so speedily as by the government undertaking at once the work of reclaiming and making fruitful and fertile the millions of acres of land fertile the millions of acres of land now its property, but absolutely

fertile the millions of acres of land now its property, but absolutely worthless without water.

"No recommendation or suggestion has ever been made by a President more important than this or worthy of more careful consideration, and I hope to see an appropriation for the reclamation of the arid lands of the nation made as regularly as that for rivers and harbors, or for any other great sind necessary work of the national government, and that the appropriation will be commensurate in amount with the great importance of the work."

BURBANK. "At the Old Cross Roads" is an odd mixture of comedy and agony. The leaders of these rival emotional forces are, comedy. Count Bouillion; agony, Parepa, the octoroon. The comedy is preferable. Esther Wilams, in the main, does well as Pr epa, the lady with an repa. the lady with an unfortunate tendency to analyze her emotions in a sobbing voice whenever she can in-duce any one to listen to her. From an artistic point of view Parepa is an appalling creation. Her faults belong Williams, who shows real, though untutored, emotional power. Aunt 'Liza is very well played by Mrs. Craig, who has true humor. Louise Vallentine as young Missip (alias Moses in de bulrush) supplies a capital touch of lightness to the play. Her portrayal is a clever little etching in charcoal. The rest of the company is above the average of support in these drifting western troupes. "At the Old Cross Roads" is a play that appeals to the masses. The immense audience on Sunday night was delighted with it.

LOS ANGELES. Charles Yale claims that this year his spectacular extravaganza, "Devil's Auction," is better than in previous years, and he makes that claim good. For those who care for electro-mechanical contrivances with a dash of fairy story in blank verse and a smack of modern farce, the production at the Los Angeles will prove enjoyable. The scenic properties are good, and the acting is not less than mediocre. There are plenty of abbreviated-skirted terpsichores to trip it on the light fantastic toe. The ballets are good, but not super-excellent. The vaudeville specialties are not as good as those provided each week at the regular vaudeville houses, and on that account rather miss fire. A large audience assembled last evening to see the auction and enjoyed the many whimsicalities of the piece. The "Devil's Auction" plays this evening. LOS ANGELES. Charles Yale claim

ORPHEUM. This is dress-suit week at the Orpheum. The adjective is colned to qualify the excellent bill at this theater, for its executive staff declare that to celebrate exceptional engagements the local head dons his dress suit. Last evening the genial manager was present in immaculate evening attire and a pleased smile. It must have been on account of Taglione, the famous European danseuse. If so, she deserved the courtesy. Taglione is the embodiment of grace and beauty. Every movement is poetry. The electrical effects and the lime lights adds color and variety to her act, making a gorgeous picture of what would be, else, only the tintiess perfection of sculpture. All should see Taglione. Those who don't care for the dancing may like the realistic spider which captures, the little danseuse in the fly dance. ORPHEUM. This is dress-suit week

Goleman's trained cats and dogs are a joy. The cats are good horsewomen and keep their seats on their bucking collie broncos. The Kaufmanns six trick cyclists, are the eleverest, riders ever seen here. They do remarkable feats, singly and in ensemble. One little feminine Kaufmann, as pretty as ahe can be, does successfully some daring feats. She is, however, surpassed by a brother rider, whose nerve and equilibrium are simply astounding. Withal the Kaufmanns act is a pretty performance, each cyclist being extremely neat and skillful in his work. Andy Lewis, as the cocaine fiend, gives a portrayal, that is amusing to the thoughtless and revolting to the serious. It is realistic, but the subject is too tragic and dreadful to be impersonated on the stage to raise merriment.

COUNCIL COMMITTEE MAKES MANY IMPORTANT CHANGES.

As Amended the Franchises Asked by the Pacific Electric Railway Company Will Be Offered for Sale-Co ld Bring a Big Return.

"If we can't get what we want, we will want what we can get."
That is the position taken by Attorney "Billy" Dunn, who is representing the Pacific Electric Railway Company in its attempts to secure extensive franchises in the city, ostensibly for the purpose of bringing its interurban lires to the center of the city.

Yesterday the attorney sat calmly by while the Council adopted the report of the Board of Public Works, cutting out of the application the most valuable parts of the route. The battle royal had been fought out previously, however, and the attorney would not have neglected the opportunity to protest had he not known that such a course would be useless.

It dawned on the Council that the so-called "loop" line in the center of the city, as published in The Times on Sunday, would give to the Huntington-Heilman syndicate a practical monopoly of the main streets of the city. Had the application been granted, as proposed, no other line of street rail-way would have been able to gain access to the business section over these streets.

Councilman Bowen was specially ac-

Bows tried to smooth the ruffled aters of debate by saying that his matest objection had been made to be "Few" franchise, a part of which it is a second of the said the application as recommended by the board franchise the one at first pro-

the 'leap' franchise, a part of which had, a eliminated. He said the application as recommended by the board was far ahead of the one at first proposed, and while he thought it would be for the best interests of the city to ceut the franchise up into two applications, in the interest of harmony he had agreed to the routes as stated in the report of the board.

"If this should prove to be a gigantic scheme to defraud the city," declared Howen, "and if we do not receive a good price for this franchise, the Council will not be blamed for not advertising separate routes. This franchise as it stands is certainly worth \$150,000 to the city. The worst had been eliminated from the application and I shall vote for it as it stands."

President Powers left the chair to reply from the floor to the intemperate remarks of Allen, who had intimated that the Traction company's applications were railroaded through by the members of this Council to understand that I would do as well by one company as by another."

"I wish the members of this Council to understand that I would do as well by one company as by another."

declared Powers. 'No railroad has a collar around my neck. All I ask is that this matter may be laid over for any week to the end that we may ex-

amine the route carefully, and see if there is senegambian in the woodpile. During the week some valid objections to the route as now proposed might arise, and I for one would like to go over the ground before voting for the application."

When the motion was put, however, only Powers, Pierce and Walker voted for delay. The motion to adopt the report was then carried.

As a result of the action of the board the "loop" franchise by which "Rilly" Dunn hoped to tie up the city in the interest of the Huntington-Hellman syndicate, has vanished into thin air. Some of the Councilmen at least will favor the rejection of any and all bids, it is understood, unless the amount offered is commensurate with the great value of the franchises.

An ordinance will be prepared for presentation at the next session of the Council providing a notice of sale of the franchise, together with all the restrictions that are commonly attached to street-railway concessions. The date for the sale will then be fixed.

way, or on Broadway from Ninth to Seventh street."

The report goes on to state that the first four changes were made because of protests from property owners, and the last two because the board, while believing that the company should have independent facilities for receiving and leaving passengers in the center of the city, thinks the same result can be obtained without the use of all the principal streets. The final section of the report reads:

"And we recommend that the City thinks the same result can be obtained without the use of all the principal streets. The final section of the report reads:

"And we recommend that the City thinks the same result can be obtained without the use of all the principal streets. The final section of the report reads:

"And we recommend that the City thinks the structed to present a notice of sale of the franchise as asked for by said company, in accordance with the changes herein indicated, provided that, however, said notice of sale shall not contain portions of streets over which there is more than one street railroad now being operated."

When the report was introduced in the Council, Walker. Powers and Pierce attempted to have the consideration of the franchise application go over a week, during which time the supplies of the Council could drive over the routes indicated and see whether it would be wise to make further changes.

The programme, however, admitted of no delay. Allen, who was most radical in his demands that the franchise be advertised at once, made a wind speech, in which he threatened that the city ink and the properties of the said of the fearners of Inglewood for the last few weeks. DELEGATION FROM INGLEWOOD.

Whether or not they would have the use of sewage water for irrigation has been the burning quesion among the farmers of Inglewood for the last few weeks. On Thursday a mass meeting was held and delegation, composed of W. H. Neher. Thomas Carter, J. F. Thomas and William McGee, was appointed to present a resolution to the Council asking an expression of the course to be pursued by that body in disposing of the water from the outfall sewer.

Since the Council arbitrarily discontinued the sale of sewage water on this side of the "summit." for any purpose whatever, all sewage Irrigators have felt very uneasy. It was feared that the Council might exend its refusal to the lands beyond the "summit" and thereby cut out the farmers of Inglewood.

The resolution adopted at the mass meeting was read to the Council yesterday morning by Mr. Neher. It asked that the use of sewage water on alfalfa, corn, grain and trees be permitted, and that a definite expression of the intentions of the Council be made so that the farmers might know whether or not to go ahead and plant their crops. Mr. Neher further stated that about one thousand acres at Inglewood is dependent on sewer irrigation and that 45 acres of alfalfa, 300 acres of corn and some orchards are now in a state of Jeopardy.

Walker said he had no objection to the use of sewer water on such crops, but where it was used on vegetables. He said he had heard such statements for the past four months, and he did not believe them true.

"I can't understand why the Council should cut off the use of sewage water intogether on his side of the 'summit,' declared Mr. Bowen. "Everybody was satisfied after the passage of the ordinance forbidding its use on vegetables, and I think that after the

outfall sewer has broken once or twice more the Council will realise it has made a great mistake. I told the citizens of Inglewood that I was entirely unable to give them any assurance in view of the past action of this bedy, and that is why they are here today."

After considerable further debate, the Council, on motion of Allen, declared it their intention to permit the use of sewer water on the other side of the "summit" during the coming season.

ouring the discussion President Pow-advocated the immediate construc-n of a new outfall sewer, which il cost, according to the estimates of City Engineer, about \$750,000.

### To Be Changed at Last.

Once again the announcement is made that the grade of Temple street will be changed. It is stated by Martin Marsh and C. F. Guthridge that the improvement is sure to be made this time. A cut of four and one-half feet on Bunker Hill avenue and a fill of six feet at Figueroa street is contemplated. It is declared most positively that the necessary 80,001 feet of frontage will be secured on a petition to be presented to the Council on Monday next. If plans do not fail, the filing of the majority petition will mark the culmination of a ten years' struggle to secure a change of grade on Temple street.

Mr. Hamburger, when seen last night with reference to this report, stated that there was absolutely no foundation for it whatever.

### LIQUOR DECISIONS.

TWO LONG BEACH CASES.

Long Beach liquor cases were decided on appeal by Judge Smith yesterday. In the H. M. Johnson case a new trail was denied and the defendant will have to pay a \$100 fine for keeping a place where liquors were sold on July S. The opinion in this case was quite exhaustive and was written that the people of Long Beach may know along just what lines they are prosecuting the liquor traffic.

One of the points raised by appellant for a new trial was based on the Recorder's action upon an affidavit filed by defendant for change of venue. Two causes were set out-first, that the Recorder was prejudiced against defendant; second, that the inhabitants of the city were prejudiced against him. The affidavit as to the Recorder, holds Judge Smith, was sufficient to TWO LONG BEACH CASES.

the justice's place of business and that it was error to try the cause in Long Beach.

Judge Smith holds, however, that section \$34 of the Municipal Corporation Act modifies the practice that obtains in justice's courts to the extent that when the Recorder is disqualified he may call in a justice of the peace to act in his place. "And." concludes Judge Smith, "this mode of procedure finds its counterpart in the practice of the Superior Court in changes of venue. In the latter courts, if the judge is disqualified for any reason, he calls in another judge; if the affidavit is against the citizens of the county, the cause is transferred to another county."

In the Olive J. Bourne case a new trial was granted. The complaint against Bourne alleged that he sold intoxicating liquors in Long Beach on July 1, but failed to set for the year 1901. The defendant was fined \$150, but the defective complaint gives him another run for his money.

It may be that this opinion is sweeping enough to make the distribution of San Francisco papers announcing the winnings of the so-called Louisiana lottery unlawful. On this point Judge Smith does not commit himself. "But," said the judge last night, "I believe that the ordinance is constitutional."

The Philistine, a unique publication from East Aurora, N. T., which announces itself as "printed every little while for the Society of the Philistines," and which is well known to little and the special to our own Billboard Wilshire, after the following fashion in its issue for December, 1991:

"One Bug-House Wilshire, who explains seven times in one article that his father left him a fortune, came on from Los Angeles to New York with intent to turn the metropolis upside

"His first move was to challenge William Jennings Bryan to a debate, \$18,100 a side, as to whether there was any
virtue left in Syracuse of the StraightFront Corset. This challenge, of course,
was for no other purpose than to advertise Wilshire, whose father left him a
fortune and nothing else.

"Willie is the man who a year ago
started a magazine at Los Angeles with
the money his mother left him, and
called said magazine The Philistine."
I had to say 'Quit that, Willie,' three
times, just like that, before he did.

"Wilshire's present magazine is the
'Poo-Bah,' and it informs the world in
black-face roman that Wilshire has a

that the contents are certainly third class, at the least. Wilshire's magasine, is entirely devoted to advertising Wilshire's Van Dyke whiskers, his check pants and tan shoes—no other possible reason for its existence being disclosed anywhere is its pages.

"Mr. Madden is surely ento his job, from Wilshire's own side of the story, which he relates in tearful strains through his whiskers, in an open letter to President Roosevelt, complaining of Madden. Then to prove his delicacy and good taste, Wilshire places a picture of the Fresident on the cover of his magasine and alongside prints another picture of himself, his Van Dyke whiskers and hot vest, bought with the money his uncle left him. Just below, in italics, is this line: 'Mr. Wilshire was a dear and personal friend of the late William Ewart Gladstone,'

"Mr. Madden is onto his job. The leaky and unstaunched quality of the Wilshire thinkery is shown when the man complains because twenty-seven numbers of his magasine at Los Angeles went through as gecond class, and his first issue at New York was flagred.

man complains because twenty-seven numbers of his magazine at Los Angeles went through as accond class, and his first issue at New Tork was flagged. Willie explains at great length that the Los Angeles issues were totally different in quality from the New York issue, and he refers to Mr. Madden did not base his ruling concerning the New York publication on an examination of the stuff printed at Los Angeles six months before.

"But the one damning count that Wilshire brings against Madden is that Mindden was once fireman on a locomotive. That Madden one fired a locomotive. That Madden one fired a locomotive, if he fired well, is to his credit; and it is equally to his credit that he fired Wilshire and the Poo-Bah. If Madden's father had left him a pot of money, then Madden would not have had to fire a locomotive, and would stand much higher in the estimation of Wilshire, paper pretends to champion the labor cause, and yet Wilshire taunts Madden with having been fireman on a locomotive. I wonder who it was who appointed Willie of the Whiskers and Warm Weskit to patronise the toilers of America—Wille who never worked a day in his life. Perhaps it was his auntie, who left him all that money.

DANISH WEST INDIES.

Harber of St. Thomas Would Be of Strategic and Commercial Value to the United States.

IBT THE NEW ASSOCIATED PRESS.—P.M.)

NEW YORK, Dec. S.—A dispatch from Copenhagen to the London Times and New York Times says the economic situation in the Danish West Indies is bad, owing to the fall in the price of sugar, but St. Thomas has an excellent harbor, which would be strategically and commercially valuable to the United States.

It is significant, says the correspondent, that in 1887 the United States offered for the two smallest islands nearly double the sum now offered for all three.

The Danish party which is opposing

all three.

The Danish party which is opposing the sale points out that it would be unwise to sell the best harbor in the West Indies, just when the Isthmian Canal is about to be built, but the majority of Danise have only agrarian interests, and have therefore no special interest in retaining the islands.

NEW YORK, Dec. S.—The Argentine
Minister, Señor Porteia, has delivered
his government's answer to Chile's note
proposing a basis of settling the pending queetions, cables the Valparaisocorrespondent of the Herald. In an interview Minister Porteia said he believed
the controversy would be ended in
three or four days.

Chile has bought a protected cruiser,
built in Elswick, Eng. The vessel is a
sister ship of the Takasago, of the
Japanese navy, and has a displacement
of 4160 tons. She was built to make
twenty-three knots an hour. The government has been authorized by Congress to sell the Errasuris and Pinto,
two small cruisers built in France.
